

ENERGY

solutions for oil and gas

Pumping Systems

Energy International provides a complete source for fluid handling needs in the oil and gas industry. Whether it is for pipeline transport of crude or liquid petroleum products, water injection, or others; our pumping systems and extensive experience of more than 150,000 hp in the industry are your best option.

BP OLEODUCTOS CENTRAL, COLOMBIA 86,000 hp

We have the capacity to provide pumping services as well as systems supply, commissioning, start-up, operation and maintenance. Crude, diesel, gas engines or turbines are the main drivers for our pumping systems. We offer a Pumping Service Agreement (PSA), a Build (Operate) Own and Transfer (BOO/BOT/BOOT) contracts among others.
